

SigMusic - In C

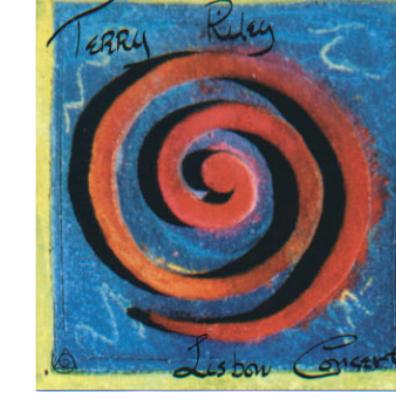

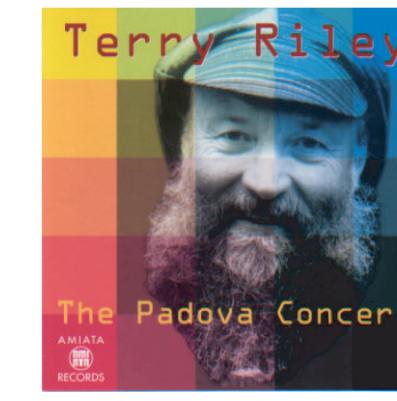

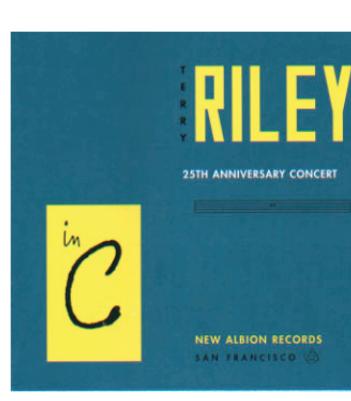

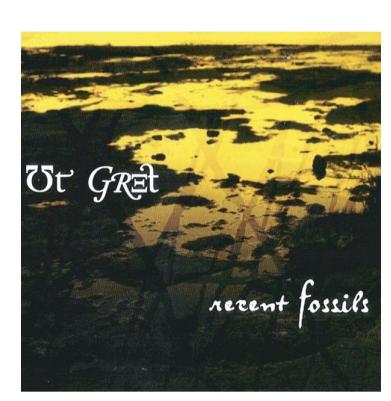

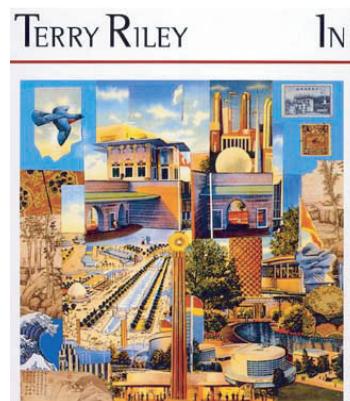

Terry Riley's 1964 piece "In C" is often considered the first "minimalist" composition. A group of musicians plays an ordered set of short musical excerpts. Each excerpt is played an indeterminate number of times.

SigMusic has implemented a computer program to perform "In C." Using Python, MIDI, XML-RPC, GTK, and an asynchronous message passing protocol, we've built software that reanimates the minimalism of the 1960's.
